ACCELERATE

**THE
ENERGY
TRANSITION**

***REWARDS
DRIVE
ACTIONS***

SolarCoin is a currency for the solar energy economy

1 MWh = 1
SLR

**Anyone can
use
SolarCoin**

Solar facility owner gets one SolarCoin for each verified MWh

Datalogger

Datalogger Specification

Full Staking Node Part of KYD

Status: Completed and operational since November, 2016

The aim of the project: A Solar Powered SolarCoin Node Generating kWh and requesting grants periodically from the SolarCoin Foundations private API (codename).

The current outcome: 100% in sync on SLR blockchain

Security: The security attack vectors and SWOT analysis by sub-system, ROK OS specialized Linux OS for full nodes.

Aims: Keeping the system streamlined to blockchain.

Datalogger performs KYC – KYD - KYE

Security, Commercialization

Key Security Objectives

1. Data origin authenticity
2. Securely sending data from logger to ledgers
3. Maintaining data securely on ledger
4. Sharing transacting data thereafter securely
