

SOFIE PROJECT OVERVIEW

Ivo Lõhmus
VP Public Sector
Ivo.Lohmus@guardtime.com

CURRENT SITUATION & CHALLENGES

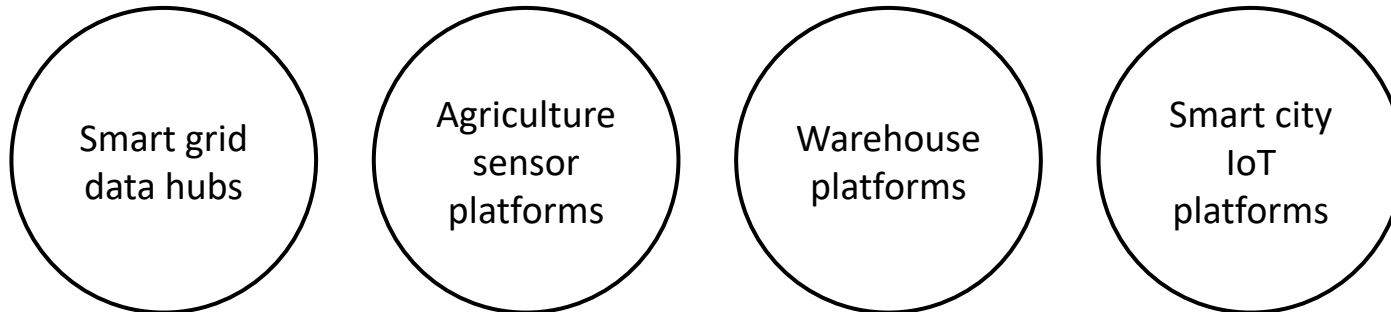

Trends

- Increased use of renewable energy sources
- Tighter security regulations
- Demand for more flexibility in energy management

Challenges

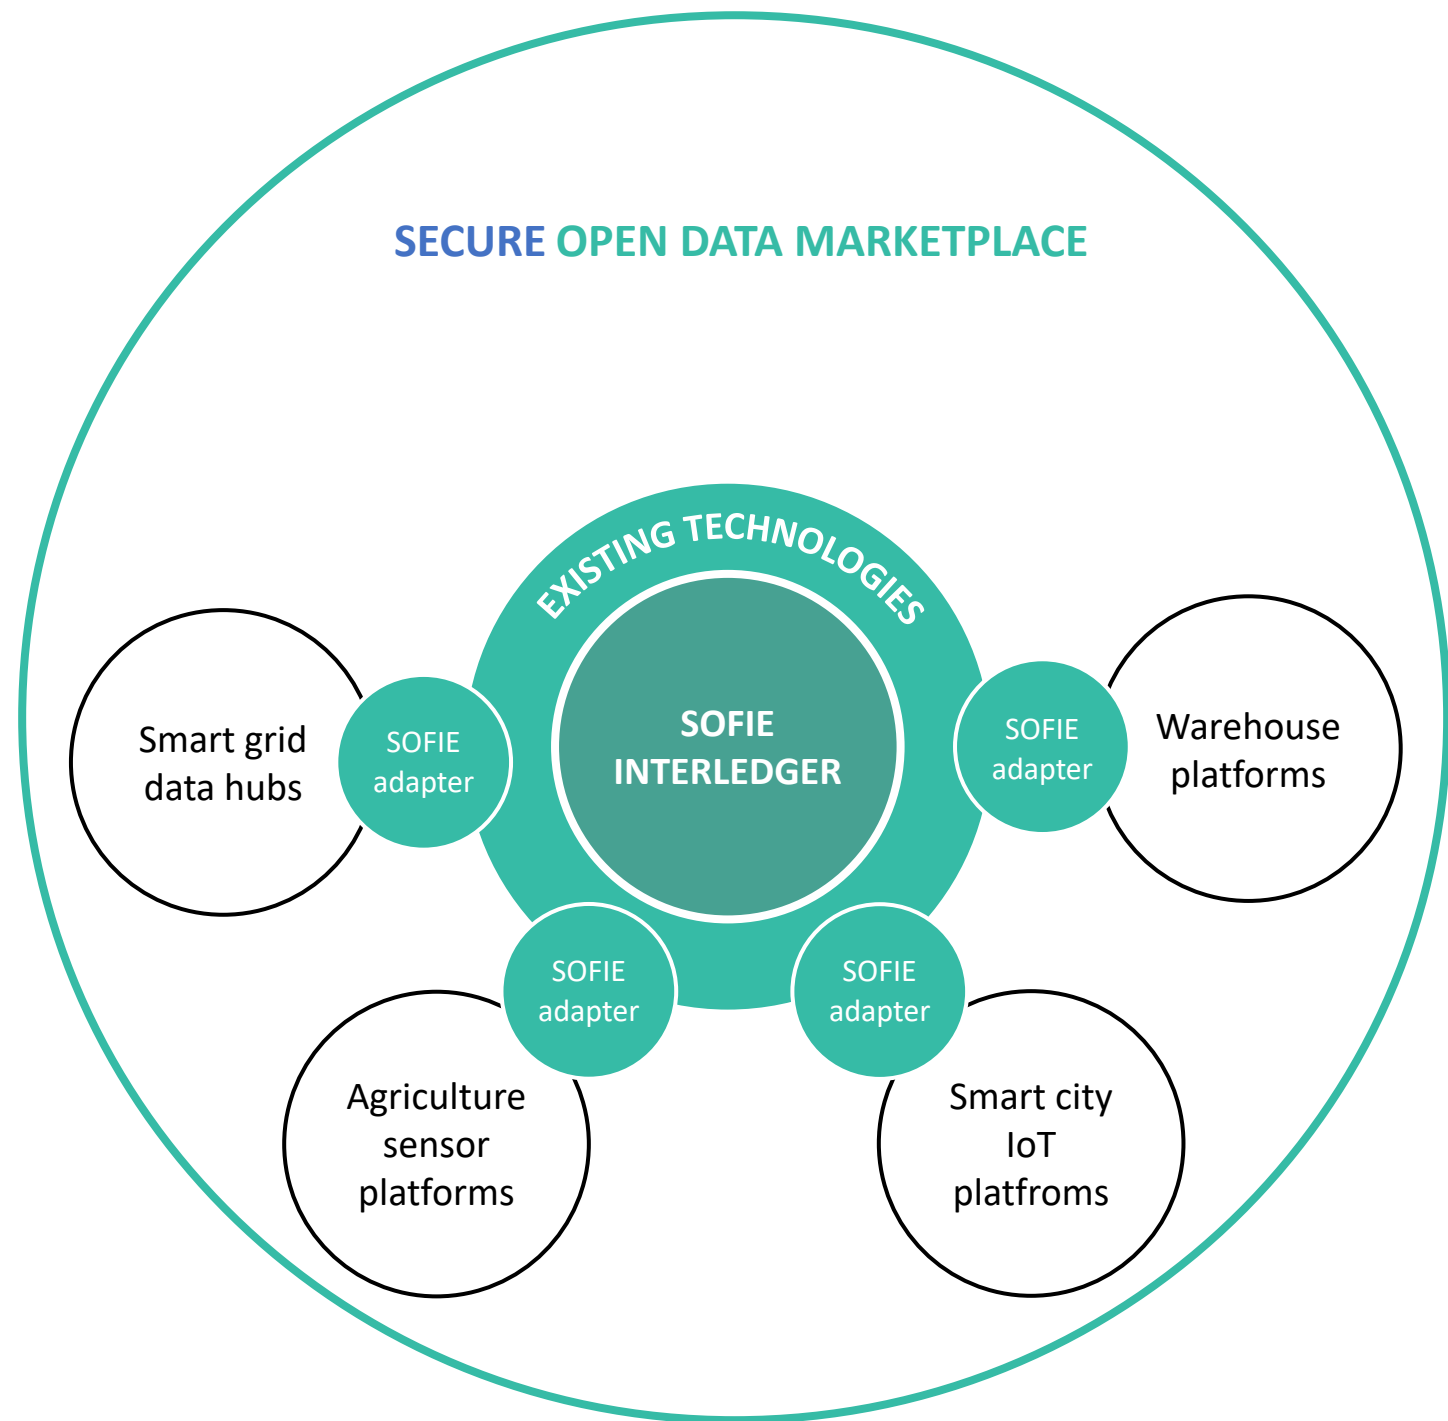

- Trust relations
- High integration costs
- Cybersecurity
- Privacy regulations
- Data normalization
- Cross-border data exchange
- Third party auditability

Current SOFIE Ecosystem

SOFIE APPROACH

- Common trust anchor for digital assets integrity
- Transaction layer (between federated silos, direct, etc)
- Tools for data monetarization, transaction and payment layer
- Data normalization, provisioning
- Cyber security and GDPR compliance
- Authentication, Authorization, identity management
